PLAN BEFORE YOU CLEAR

THE LAND-CLEARING PROJECT PLANNING CHECKLIST

Clearing land is a big move. A little planning up front prevents expensive headaches later. Work through this checklist before the first machine ever rolls onto your property.

BEFORE YOU CLEAR: THE ESSENTIALS

Print this page, walk your property, and check each box. Bring it to your estimate — a contractor who answers these well is one worth hiring.

- ☐ Define the goal. Building pad, pasture, views, firebreak, or getting it ready to sell? The finish you want drives the whole plan.
- ☐ Walk and mark. Flag the keepers — heritage oaks, the well, septic, property corners — and the areas you most want opened up.
- ☐ Call 811 before any digging. Have underground water, electric, and gas located and marked. This is free and it's the law.
- ☐ Note drainage and slopes. Mark low spots, creeks, and grades. Keeping mulch on site protects these from erosion.
- ☐ Check the rules. County, HOA, floodplain, burn bans, and any ag-valuation impact — confirm before you start.

DEBRIS, ACCESS & TIMING

- ☐ Decide on the debris. Mulch on site (cheapest, best for the soil), haul off, or burn. Mulching avoids trucking and permits.
- ☐ Plan access and staging. Confirm gate width and equipment access, and where mulch or material will go.
- ☐ Pick the timing. Drier ground clears faster and cleaner. Plan around wet season and burn bans.
- ☐ Choose the right crew. Insured, pro-grade equipment, clean finished mulch, and a written, fixed quote.
- ☐ Do a pre-start walkthrough. Confirm scope, boundaries, the keepers, and exactly what the finished ground will look like.

RED FLAGS IN A CLEARING QUOTE

Walk away — or ask hard questions — if you see any of these:

- >>> No proof of insurance.
- >>> A vague, verbal-only price, or pay-as-we-go with no cap.
- >>> No clear plan for debris or cleanup.
- >>> Can't show you photos of finished work.
- >>> Promises the lowest price but won't talk about the finish.
